THE WHEAT CROP IS ON THE MOVE NORMAL SCHOOL

Eighteen Hundred Car Loads Wheat Received For Shipment on this Division of the Santa Fe This Week.

BEGINNING TO THRESH HERE.

Another Week May Blockade the Road With Wheat Trains.

Eighteen hundred cars of wheat is the record on this division for the first week following harvest. Threshing has only just begun and it was thought here that very little would be marketed during the past week, but as stated before 1800 cars have been turned over to the Santa Fe for shipment on the division from here east to Newton. On the division east from Newton the road has been almost blocked, as it handles the wheat from this division, from the Pan Handle division and the Oklahoma division, and is already working a dozen extra crews in an effort to prevent a blockade.

On this division three extra freight crews have been added and three extra engines, and all of the cars available are being sent for. Yesterday on the Kinley cut-off 138 cars of wheat were received for shipment.

With the grain moving at this rate the first week of threshing the Santa Fe will certainly need a lot of men and equipment to handle the 1909 crop on this division.

Threshing has only just fairly begun in Ford county and not a great deal can be learned regarding the bulk of the crop yet. We want the machine measurement to show up that 2,000,000 bushels for the county. A few have started hauling from the threshers to Dodge City. Tuesday the Dodge City mill received 42 loads during the day, not half the amount this mill receives in a day during the busy time of hauling. Wheat up to the present has stayed up to the dollar mark, and the man who has a good yield is feeling pretty well satisfied with himself and the country.

WHERE TO KICK.

When Your Insurance Rates are Popped Up Tell Your Troubles to the Insurance Commissioner.

Regarding insurance rates that try to soar aloft with the price of wheat, the Hutchinson News says:

"If your insurance rates have been boosted, kick. And kick to the right party, where it will do some good. Send your kick to Charles W. Barnes, insurance superintendent, Topeka, Kansas.

There have been increases in insurance rates at some towns, possibly in Hutchinson, and agents have been known to explain the increase by saying that the new law is responsible. This is not true. On the contrary the new law provides a means for a fair adjustment of rates, something the insured has never had before.

The situation is just this. Insurance companies, under the law enacted by the legislature last winter, are required to file their rates with the insurance commissioner, who is empowered by the same law to change those rates on a showing that the rates are unfair. He has the same power with reference to insurance rates that the board of railroad commissioners have with respect to railroad rates. If your fire insurance rates have been increased or if you think the present rate too high, regardless of whether it has been recently increased, send a complaint to the superintendent of insurance.

In doing this, state your reasons for believing the rates are extortionate. It will help the superintendent to attend to your case. He will have hundreds, perhaps thousands of com-

plaints, and he may not attend to your case as speedily as you desire, but he will do his best. Already he has ordered reductions at Abilene, where he made investigation following a complaint, and he is proceeding with investigations at other points.

So if you feel that the insurance companies are mistreating you, kick, kick hard, and kick to the right party—the insurance superintendent—instead of merely leaning back and "cussin' the gov'munt."

WON SHUT-OUT GAME.

Dodge City Team Was Too Heavy and Too Fast for the Boys from Up the Road.

The ball game at the new grounds here Sunday afternoon was a close game for the first four innings, then the visitors found the pace too fast, and they did not have the kind of grit to fight out a losing game. The visiting team came from Ingalls, but they had help from outside. It was believed when the game started that it would be a close one. The first inning was a shut out on both sides, then the Dodge boys got in a run in the second. It seemed easy, so they repeated it in the fourth. In the fifth the Dodge team got three men over the home plate, and with a score in the fifth of 0 to 5, the visitors seemed to lose heart. They completed the game without a score, while the Dodge boys went crazy in the eighth and scored eight runs for the one inning, leaving the game 13 to 0.

The Dodge team had a splendid infield. The battery, Fowler and Shoup, worked like leaguers, but played much better in the last half than in the first.

The biggest feature of the game was at the opening of the fourth inning. With a man on first base, the second man of the Ingalls team went to bat and lined a hot one directly over the second baseman. It looked like a safe hit and a good one, but as it started Eash leaped into the air just high enough to bring it down with one hand. The ball was batted, caught and a double play made by Eash in just about two seconds, and if the game had been a close one half the crowd might have fainted. This great play was followed up by Eash in the fifth inning with a beautiful hot luer which went through the infield and let in two runs for Dodge.

The Dodge team was in shape for a great game, if the visitors had only been fast enough to have made it interesting. With the present line-up there ought to be some fine games here this summer. The players and positions in the Dodge-Ingalls game follow:

Dodge City	Position	Ingalls
Fields	1st base	E. Garrison
Brown	3rd base	F. Benton
Eash	2nd base	Bennett
McGregor	short stop	O. Allen
Fowler	pitcher	W. F. Fenton
Shoup	catcher	G. Garrison
Seaman	c. field	Burton
Swain	i. field	Gilbert
Burwick	r. field	Douglass

Score by Innings:
Dodge City—0 1 0 1 3 0 0 8 —13
Ingalls—0 0 0 0 0 0 0 0 —0

PLAN TO BE CHANGED.

Council Meeting Will Be Called to Change Ordinance Calling the Bond Election.

This week it has been discovered that the ordinance recently passed calling a bond election for building a city water works, should have been drawn differently, or that it might be of advantage to have it otherwise worded. A meeting of the council will be called to consider the matter and if it is thought necessary, to pass a different ordinance.

All of the members of the council excepting B. F. Martin are in the city and the matter can be taken up at a special called meeting.

DODGE CITY HIGH SCHOOL

ADDS TEACHERS' TRAINING COURSE.

GRADUATES TAKING COURSE

Will Get Certificates Good All Over State. State Will Share Expense.

Ford county young people who desire to teach will have the benefit in the future of preparing themselves here at home, so that they will have the necessary training, and so that they will have a certificate good anywhere in the state. The Normal training course, which has been established by the state for high schools approved by the State Board of Education, will be put in the Dodge City high school this year, and the juniors and seniors of the high school may enter the class and receive the same training that they would receive at the State Normal. Should any of them wish to study further in the State Normal they will be accredited with two years' work done in the high school here, so that the complete course at the State Normal would take only two years. This work was laid out for the State Board of Education by the last legislature, and ninety nine schools in the state have been approved by the state board for the course, Dodge City being among the number.

The Dodge City high school will receive \$500 from the state toward the expense of this course, and it is probable that an extra teacher will have to be employed to take charge of the work. Under this system, any young person of Ford county may fit himself, or herself, for a teacher without leaving the county, and hold a certificate that will be recognized by any county in the state. With this addition to the regular high school course, Dodge City and Ford county will have excellent educational advantages.

The question of more room is one which will come up in the near future for the Board of Education to settle here. With this addition the high school will probably crowd the third ward school building, and it is only a question of a short time until another ward school building will be needed, but in any event this was to be expected in a growing town like Dodge City. In fact the school buildings have not been hardly sufficient for the past three years.

There are a lot of young people in the county who should take advantage of this high school, especially as the Normal training course is to be added, and the high school attendance ought to be increased rapidly. The new law is intended to give advantages to the pupils all over the county as well as to the towns where the schools are located. In fact more of the young people from the outside schools are likely to take a tangle of the teachers' training course, than the young people of the towns.

It will be important that arrangements be made in Dodge City, either by the club method, or by some other, so that pupils from the district schools can secure inexpensive board while attending school here. Such arrangements are made in all school towns, and it causes many to complete school, where they otherwise could not.

The Board of Education here has taken no action as yet regarding the new course to be added to the high school. Some of the members and the Superintendent have discussed the matter privately, but no decision has been made regarding the extra room needed or the extra instructor.

If people with symptoms of kidney or bladder trouble could realize their danger they would without loss of time commence taking Foley's Kidney Remedy. This great remedy stops the pain and the irregularities, strengthens and builds up these organs and there is no danger of Bright's disease or other serious disorder. Do not disregard the early symptoms. The Palace Drug Store.

TEAMS WANTED

GENERAL MANAGER TRAYLOR PROMISES WATER IN DITCH FOR FALL CROPS.

IF TEAMS CAN BE HAD

This Is an Important Matter for the Land Owners Along the Eureka Canal.

If the people along the route of the Eureka Canal want water in the ditch for fall crops, they can help just now by furnishing teams and men. If a large force can be put on the ditch the first of the month for a week or two the work of cleaning out the ditch can be accomplished, and with the force they expect on the well at the head of the ditch, the water would soon be running across Ford county.

General Manager Traylor spent Tuesday night in Dodge City and left Wednesday on a trip of inspection of the engineering gang that is working down the canal near Spearville. Mr. Traylor reports that twenty-five teams were at work on the ditch Tuesday, and it is expected that they will have forty teams at work by the end of the week.

Contracts will be let the first of August for plowing out the bottom of the ditch from Ingalls to a point in the neighborhood of Wright, preceding the final scraper work.

It will greatly hurry the work if parties along the line will take contracts for two to four miles, and it is to the interest of the land owners to see that this work is done quickly. There has been some trouble during

harvest time to get men and teams on the ditch work, and this has caused a great delay.

Mr. Traylor says that they will have water in the ditch for fall wheat if plenty of teams can be hired to do the work. It looks like each neighborhood through which the ditch passes would see that the ditch people were not delayed on account of difficulty of hiring a force.

LAST NOTICE.

The ordinance requiring people of Dodge City to keep the weeds cut will be enforced. It has been hoped that all would see to this matter without putting themselves add the city to further expense. This will be the last notice given. The next step will be taken by the Police court.

A. Gluck, Mayor.

For Sale or Rent.

300 acres nine miles east of Dodge City on the Arkansas river, and one mile from railroad station on Rock Island. 300 acres wheat land, 100 acres corn land. Nearly 100 acres well set to alfalfa. Balance in meadow and pasture. Poor health the only cause for disposing of the farm. Apply to R. M. Wright, Dodge City, Kansas.

Money to loan on real estate. See P. H. Young.
